-ooOoo-

At the 1940 National 4-H Club Camp the writer was requested to obtain information from State club leaders relative to the enrollment, for the college year of 1940-41, of former 4-H Club members in the courses in agriculture and home economics at the State colleges of agriculture throughout the United States. This study is based on the information received from 37 States.

The data for the college year 1940-41 show that, of the reported 36,247 students enrolled in agriculture and home economics, 11,272, or 31.10 percent, were former 4-H Club members.

For the college year 1940-41, Illinois ranked first, with 50.34 percent of these students being former 4-H Club members; Nebraska second, with 49.54 percent; Indiana third, with 47.15 percent; Georgia fourth, with 44.79 percent; Alabama fifth, with 44.34 percent; Kansas sixth, with 43.25 percent; and Arkansas seventh, with 41.18 percent.

---

DISTRIBUTION: A copy of this summary has been sent to each president, dean of agriculture, dean of home economics, and registrar of State agricultural colleges; director of extension, State club leader, county agent leader, and home demonstration leader; extension editor; agricultural-college library and experiment-station library.

It seems appropriate to obtain information of this type. The State colleges of agriculture and the United States Department of Agriculture are expending funds annually for the 4-H Club program as an integral part of cooperative extension work. One measuring stick of the effectiveness of the 4-H program is the extent to which there is fostered a desire on the part of 4-H Club members to obtain additional scholastic training. The data reported seem to indicate that such a desire is being fostered and that an increasing number of former 4-H Club members are enrolling in the State colleges of agriculture.

No attempt has been made to obtain information regarding entrance into courses other than agriculture and home economics or at any college other than the State college of agriculture. It is known, however, that many former 4-H Club members enter other courses at the agricultural college, and also that many more enroll as students at other educational institutions.

Notes

The States of Illinois, Iowa, Michigan, Missouri, Nebraska, Ohio, Virginia, Washington, and Wyoming reported former 4-H Club members now enrolled as graduate or special students. Doubtless this situation also obtains in many other States.

Alabama submitted data that do not include information regarding freshman students.

California submitted data that cover Berkeley campus only.

Kansas reported a total of 1,099 former 4-H members in Kansas State College.

Louisiana submitted data that do not include information regarding freshman students.

New Hampshire reported 21 former 4-H members out of 48 in 2-year applied-farming course.

Pennsylvania reported 13 former 4-H members out of 176 in 2-year agricultural course.

Texas submitted data that apply to boys only. No home-economics course at Texas A. & M. College.

Washington reported a total of 660 former 4-H members in State College of Washington.

Wisconsin reported about 90 percent of approximately 400 students in the agricultural short course were former 4-H members.
